Free Shipping on REDARC online sales

REDARC is now offering customers free freight within Australia on all products purchased via the REDARC website.

“Providing free freight is another way REDARC has enhanced its customer experience as it provides a customer driven approach to business” said Ben Marsh, National Sales and Marketing Manager.

“We want our customers to know that the price they see is the price they pay” he said.

All products purchased via the REDARC website have a 5 day lead time before shipment and will be shipped via the most economical freight option.

Average delivery times to major cities are expected to be 3-4 days and 4-5 days to non-metro areas.

Next business day or Express Post parcels will not be included in the free freight offer and customers should contact REDARC for Express freight options.

REDARC is frequently recognised as an innovator in the research, design, development and manufacture of a range of electronic voltage converters and associated products and this latest step is another example of the company’s commitment to customer satisfaction.
