

30 June 2009

To whom it may concern,

Lumen Australia provides a large and diverse variety of products to meet the needs of the Australian and international automotive industries. This enables us to provide complete customized system solutions to the customer. Our systems may include a vehicle interface wiring harness, control modules, customized mounting bracket, enclosures, fitting instructions, user manuals and accessory kits.

Lumen proudly integrates the REDARC Smart Start SBI 12 product into our dual battery systems that are sold to GMH for fitment into Police vehicles. The SBI 12 is also integrated into systems we supply to Jayco, the largest recreational vehicle producer in the Southern Hemisphere, with products including motor homes, caravans, camper trailers, leisure homes and park cabins.

Lumen is impressed by the robust and rugged design of the REDARC Smart Start SBI dual battery system. It has the quality and features required by our customers and we proudly support Australian designed and manufactured innovative products like the REDARC Smart Start.

If you would like further information please do not hesitate to contact me.

Yours sincerely,

Mark Walter
Engineering Manager
Lumen Australia
