

Important Care Guide!

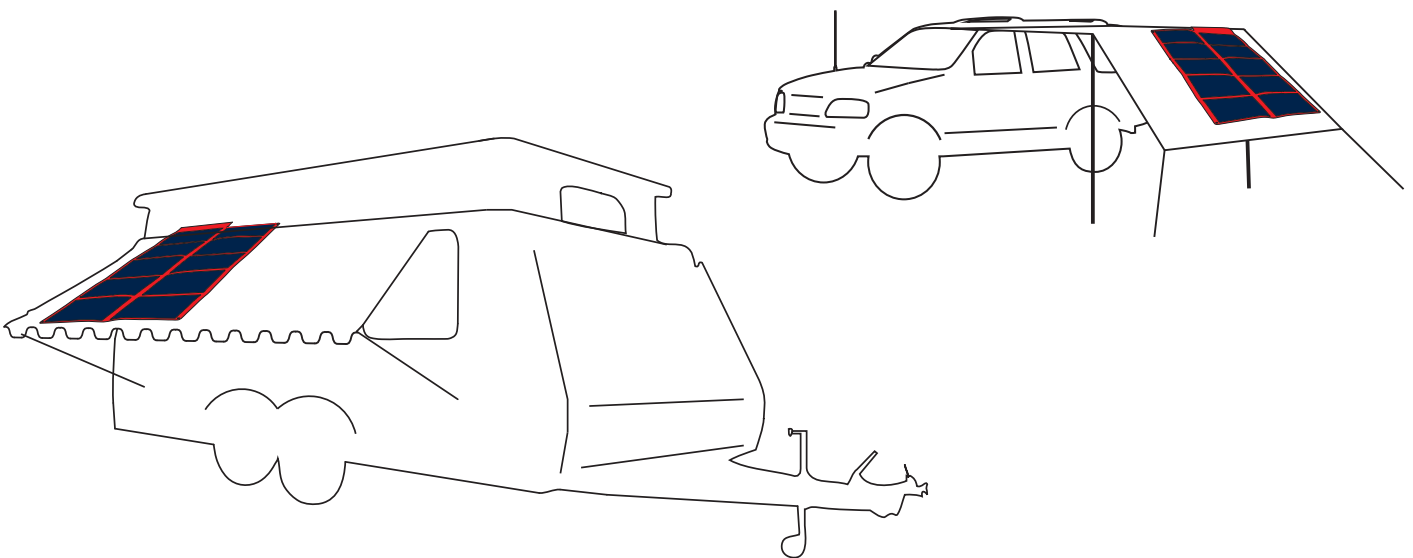

Using my Solar Blanket

- Your solar blanket will work best when it is facing directly towards the sun at the correct angle for your location
- The ideal location for your blanket is suspended from an awning or vehicle roof rack

Keep the Solar Blanket pointing towards the sun throughout the day.

A lot of the sun's available energy can be lost if not pointed directly at the sun.

Cleaning my Solar Blanket

- Prevent scratches and increase charging performance by keeping solar blanket free from dust, dirt or sand
- Allow your blanket to cool before cleaning
- Do not use any chemical cleaning agents
- Carefully remove dust or dirt using a sponge or damp clean chamois and dry with a soft microfibre cloth

Storing my Solar Blanket

- Allow your solar blanket to dry before folding away
- Store your solar blanket in a dry cool place
- Take care to store your blanket securely to prevent damage during transit
